Here is the list of the longest and the deepest caves and pits in Croatia. In cadaster of the Croatian speleological features (caves and pits) are more than 8650 caves and pits. It is important to say that this cadaster does not contents all the speleological and karst phenomena, but only the speleological features - caves and pits according to the internationally recognised classifications namely, in some speleological cadasters we can find bigger doline, the bigger fissures in the rocks, natural bridges, all the karst springs, under sea springs, and some where even the artificial speleological objects (tunnels, catacombs, old mines, etc.). Also here are conditions for organising speleological expeditions in Croatia proposed by Croatian Speleological Federation, which will help foreign cavers and speleologists in organising such expeditions.
