Our presentation will show and explain our flood caves with emphasis on explorations, survey and profile. We will make the presentation from: - Formoso Springs - Mimoso Cave - Ceita Corê Springs - Mysterious Lagoon - Fosseis Springs - Bee's Hole

We will start talking about how cave diving started in Brazil and where we are right now, our possibilities to discover new flood caves and still explore some caves. At Formoso Springs and Ceita Corê springs we will make the profile to make a real exploration there and also the maps from both caves have high resolution. At Mimoso cave and Fosseis cave we will show a short video with images very clear and some shots. After the presentation we will open the meeting to answer questions about those caves.
